

Social Import (Auto-fill)

How to Add a Creative using Social Import (Auto-fill)

Social Import

Social Import works for **Public, Organic post** from **Facebook, Instagram, TikTok, YouTube, X (formerly Twitter)** and **LinkedIn**

For more details refer to our Wiki Article at [this link](#)

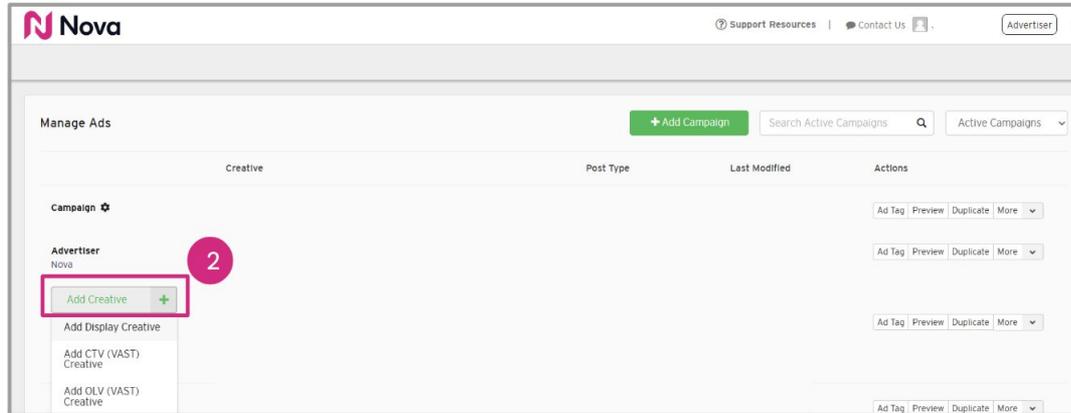

When can auto-fill be used?

- Public posts from **Facebook, Instagram, TikTok, YouTube, X (formerly Twitter)** and **LinkedIn** can be imported via auto-fill
- Public posts are accessible without requiring user login. Try to open the URL in an Incognito window to test
- Manual asset upload must be used for other social post formats (like **Pinterest, Snapchat, Threads** etc.)
- Posts which are geo-locked, age-restricted or private cannot be auto-filled
- Alcohol brands are an example of a category where Auto-fill cannot be used due to being age-restricted

How to import a social post into Nova UI?

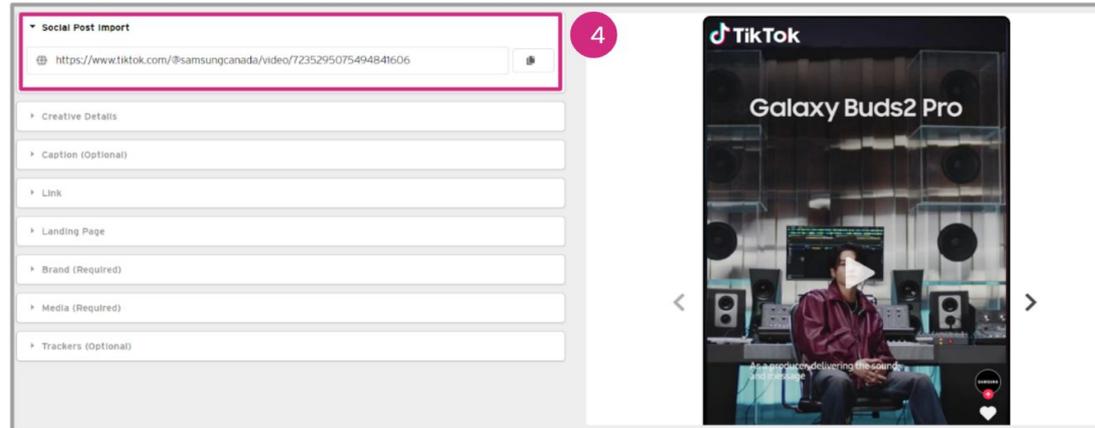

1. Verify whether the post is public and Copy the Social Public Post URL from the desired social media (like FB, IG)
2. In the Nova UI Dashboard, under any Campaign click on **Add Creative**
Learn How to Create a Campaign in Nova UI [Here](#)

3. Click **Add Display Creative**

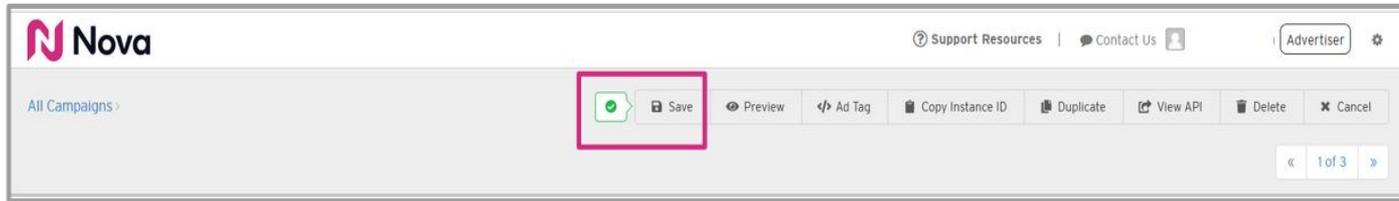

4. Paste the URL into the **Social Post Import** box

5. Wait for the information to auto-fill

6. Update the fields as desired

7. **Save** the creative

8. Refer to the following articles to learn [How to Generate a Preview](#) and [How to Copy or Export an Ad Tag](#)
